

We purchased Plank Road Cottages & Marina in June 2010. The business has been in operation since the 1930s and although we love the history behind our resort, we weren't too impressed with the "historical" website.

Terry was able to create a website quickly and efficiently bringing the history into the website and into the current era. Terry ensures that any updates are carried out quickly and professionally. He is pleasant, friendly, and always offers great suggestions. Thanks HitsMedia for your excellent service and commitment.
